LABMODUL BALANCING TABLES

Professional balancing table

Vibration-free weight base

Balancing stone in granite

High-quality design

Height adjustable function for technical weights

Sitting and standing workspaces

Balancing table

The balancing table in column design provides a sturdy base for analysis scales and microscopes. The equipment is placed on a heavy granite stone with shock absorbing suspension.

The balancing stone is kept free of the worktop so that shaking on the working table is not propagates to the equipment.

Balancing tables are offered for sitting in 75 cm in height or for standing work-places in height 93 cm, and can also be incorporated into fume cupboards and other ventilated units.

Support for balancing table

The support for the table is the most stable solution available for balancing and it is easy to build in both a table and fume cupboards.

The balancing section is ideal for micro and analytical scales, that require a vibration-free environment when weighing with an accuracy of more than 3 decimals per gram.

The system is equipped with a sturdy health-welded frame and with a durable and stable polished granite stone mounted on vibration damping material. Offered for both standing and seated workplaces.

Intergrated analytical weight

Balancing tables for analytical balance, can be supplied with the balance integrated into the Worktops. The table can be delivered with a height adjustable function.

The stainless steel weight measures from 0 to 5,000 grams and has dimensions of 245×245 mm. The depth is 33 mm.

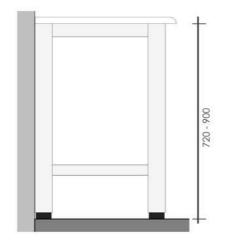

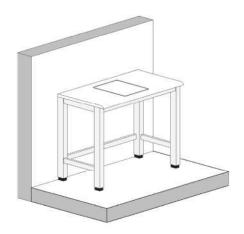

Balancing table, Double frame

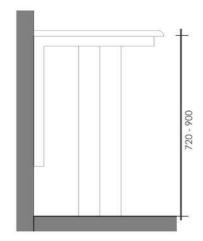

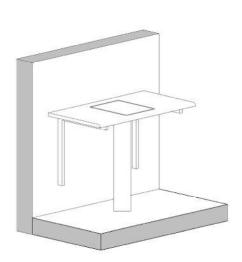

Balancing table, Wall brackets

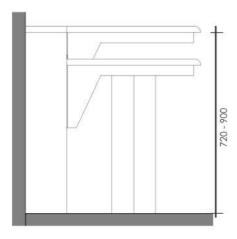

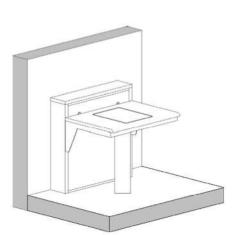

Balancing table, Panel module

Flexible Balancing table

A loose balancing table is a flexible solution for balancing. The weighing section is ideal for micro and analytical scales, that require a vibration-free environment when weighing with an accuracy of more than 3 decimals per gram.

The system is equipped with a sturdy health-welded frame and with a durable and stable polished granite stone mounted on vibration damping material. Offered for both standing and seated workplaces.

- Complies with the highest standards of anti-vibration with 3 vibration dampers
- Ensures fast stabilization times

Balancing table, with double frame

The balancing table consists of 2 fully welded frames made in pipe sections connected to horizontal spacers at the bottom of the 2 gables. The steel structures are electrostatic powder-coated in a thickness of at least 80 mm in accordance with ISO Standard No. 2802, resistant to all chemicals normally used in a laboratory.

The balancing table is delivered in different module dimensions for the best possible use of the rooms and is performed in height 720 and 900 mm with a 30 mm Worktops.

Each frame is fitted with 4 scaffolds (c)

Each frame is fitted with 4 scaffolds (c) for leveling in the floor.
